Hi Dan,

My apologies, I forgot to follow up with you on this. I just attached the image to the document; see here as well. Feel free to let me know if you want me to add any other label or color. In fact, I will send you an invite in case you want to modify anything else, but it is pretty easy, so just let me know and I will do it right away, not waiting.

Here is the link: [Quantum-Image](#)

 Hi Pieter, did you ever finish this image?

Thanks

Yeah, I can do that.

 Hi Piter,

Favor to ask: Can you alter this image so that:

1. The attacker icon with the hood is removed and the X is removed.
2. Demonstrate not an adversarial nature of things, but instead more of a stochastic nature. One idea is to demonstrate "stochastic-ness" along each of the paths. Maybe just label each path with "stochastic" ?? Just one idea that I have.

The intent is to covert the image from Jie's work that focuses on the adversarial nature of his work, to now focus on the stochastic nature of our focused effort.

The image doesn't have to be super perfect or anything, so don't worry about any minor imperfections.

Thank you so much for doing this.
-Dan
