Would you be ok if we did it at 730? Is that too early?

Sounds good!

I can definitely meet at 8 am or earlier on Monday.

If you need it earlier, feel free to let me know.

Piter

Hi Dan,

I hope this email finds you well.

I'm writing to request that we move our scheduled meeting from this Friday to Monday, if possible.

I have several critical papers and assignments due this week that require my full attention. While I would normally manage this alongside our meeting, my recovery process is still requiring 8+ hours of sleep, which is significantly impacting my available working hours in the mornings this week. Moving our meeting to Monday would provide me with the necessary time to:

1. Properly complete and submit my coursework assignments/papers
2. Finalize the iCMAB integration work we discussed
3. Better organize all the research outputs from our EXPNeuralUCB implementation

To ensure you have all the information needed for our discussion, I will be providing you with two brief summaries before our meeting:

- **EXPNeuralUCB Test Results Summary:** Comparing our comprehensive implementation results against the original paper
- **iCMAB Integration Progress:** Current status and next steps for the hybrid framework

I'll also ensure you have direct access to all the work, code, and detailed results referenced in these summaries, so you can review everything at your convenience.

I apologize for any inconvenience this may cause, and I truly appreciate your understanding as I balance recovery with maintaining the quality of my academic work and our research collaboration.

Please let me know if Monday works for your schedule, and what time would be most convenient for you.

Best regards,
Piter
